ABOUT THE COMPANY

Startec Holding is your reliable partner in the field of manufacturing, supply, and maintenance of metalworking and energy equipment, along with everything related to it.

Today, the company is present in Ukraine and Poland. Operating in two markets simultaneously enables us to secure the most favorable conditions from global manufacturers and provide our clients with the best cost-to-quality solutions.

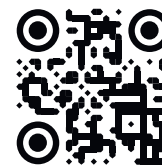

Our Ukrainian office is a team of professionals in metalworking and energy sectors. We take pride in our experts – even the youngest has over 5 years of experience, while our most senior colleague has 30+ years of industry leadership.

Startec Holding is not just a company – it's a community of experts united by the goal of delivering the best solutions for all kinds of industrial challenges, including non-standard tasks.

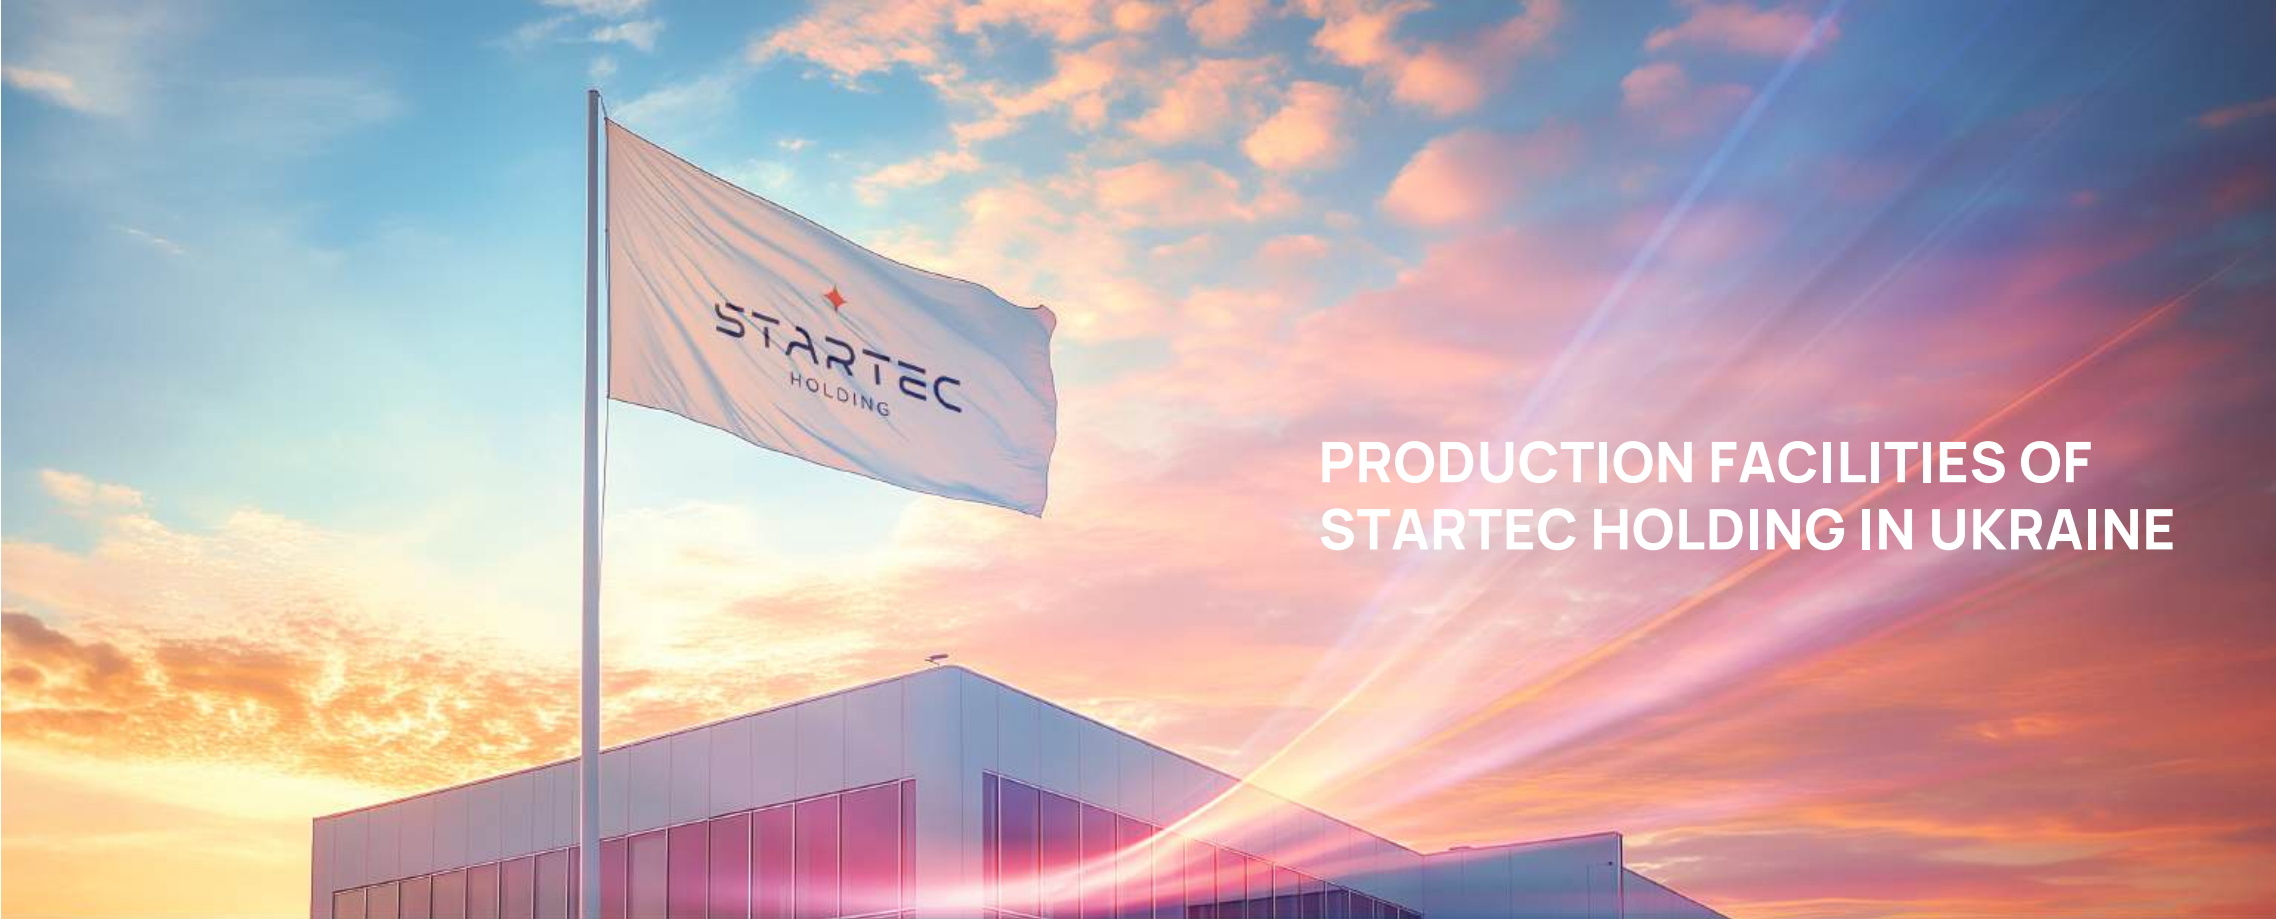

Our specialists have implemented thousands of projects and visited numerous enterprises worldwide, selecting trusted manufacturers of quality equipment.

Today, we are able to offer clients the most innovative and efficient solutions. We are not only a supplier – we are your partner, accompanying you at every stage of

We also have our own production facilities, including two manufacturing sites in Sumy and Kyiv, as well as an engineering center in Kyiv. Having our own production capabilities and engineering team allows us to meet the needs of even the most demanding clients.

PRODUCTION FACILITIES OF STARTEC HOLDING IN UKRAINE

Startec Holding – your reliable guide in the world of advanced technologies and professional development. Let's shape the technological future of our country together!

Kyiv Plant

Focuses on the production of automated and robotic lines, sheet metal cutting and processing equipment, galvanic equipment, and a range of spare parts and consumables for nuclear power plants.

Engineering Center

Our engineers constantly develop custom machine-building and metalworking solutions. We are proud of our design engineers, technologists, and electronics specialists ready to solve complex technical tasks.

Sumy Machine-Building Plant

Specializes in the production of equipment, parts, and consumables for nuclear energy, including components used in safety-important systems of nuclear power plants – reflecting a high standard of our production processes and technologies.

Our key partners

Startec Holding team has successfully implemented a significant number of projects for enterprises of the Ukrainian state concern Ukroboronprom, which play a crucial role in strengthening the country's defense capabilities. Some of these projects were large-scale and strategically important, making a substantial contribution to the fulfillment of state defense orders and enhancing the operational efficiency of the

At Startec Holding, we deeply value the opportunity to contribute to strengthening Ukraine's defense capabilities. We have successfully delivered and commissioned a wide range of equipment for units of the Ministry of Defense of Ukraine, playing an important role in meeting their operational needs.

State Space Agency of Ukraine – is one of Startec Holding's key partners. We have delivered and commissioned modern metalworking machines that have become a crucial factor in enhancing the industry's production capabilities. concern's enterprises.

Our key partners

NNEGC "Energoatom" - remains a long-standing and one of the key partners of Startec Holding. Our company manufactures and supplies critically important consumables to ensure the stable operation of nuclear power plants. In addition, we consistently deliver modern metalworking equipment that contributes to improving the efficiency of production processes at nuclear facilities.

ArcelorMittal

Startec Holding has successfully implemented a number of large-scale projects for ArcelorMittal, one of the world's leading steel producers. We have delivered high-tech equipment that contributed to the modernization of key production processes at the company's facilities.

Kyivteploenergo - one of the largest energy enterprises in Ukraine, provides heating and electricity for the capital city. In cooperation with Startec Holding, several projects have been implemented to modernize technological equipment, aimed at increasing production efficiency and reducing energy consumption. We are proud that our products contribute to the sustainable development of Kyiv's critically important infrastructure.

Exclusive brands

LEADWELL – A Leader in High-Precision CNC Machine Manufacturing

LEADWELL is one of the global leaders in the production of high-precision CNC machines. This time-tested brand has been offering high-quality CNC equipment to the market for over 40 years. LEADWELL machines are known for their durability, reliability, and excellent price-to-performance ratio. They are capable of withstanding heavy workloads and delivering consistent results over many years.

GDW Werkzeugmaschinen GmbH – Impressive Precision, German Engineering Excellence, Uncompromising Quality

GDW Werkzeugmaschinen GmbH is a leading German manufacturer of high-quality metalworking machines. The company specializes in the design and production of lathes known for their reliability, precision, and innovative technological solutions.

ZMM Bulgaria Holding - Engineered for Complex Industrial Challenges

ZMM Bulgaria Holding is a group of Bulgarian machine-building companies specializing in the production of metal-cutting equipment, including CNC lathes, universal lathes, and other engineering solutions.
